1. Read the following passage carefully: **6**
Cholera Stalks KRK
Disease Toll 83, Govt. Fears Rerun of 2007 Epidemic
1. With water borne diseases wreaking havoc on the KRK region, the Orissa government on Thursday admitted that it was just not diarrhoea but the dangerous cholera that had emerged as the killer during the past few weeks. This came after the city based Regional Medical Research Centre (RMRC) confirmed that six out of the 16 rectal swabs collected from the worst-hit Rayagada district tested positive for “vibrio cholerae” bacteria.
2. The startling revelation coincided with one more death reported from Rayagada, sending the alarm bells ringing in the state government. Health mandarins and doctors have started apprehending a repeat of the 2007 epidemic in Rayagada, Koraput and Kalahandi districts when hundreds had perished to cholera and gastro-enteritis. The epidemic this year is also the same and since the beginning of August as many as 83 people, comprising 34 in Rayagada, 27 in Nuapada, 10 in Nabarangpur, 8 in Malkangiri and 4 in Kalahandi have already succumbed to diarrhoea and related ailments, according to the state disease surveillance cell here.
3. “Our tests found presence of Vibrio cholerae bacteria in some samples sent to us by the state health department,” Director, RMRC, SK Kar told ToI, “Taking advantage of climatic changes the bacteria” s toxic form increases and causes severe problems when infected water is consumed,” he added. Kar further informed that while reports, of some rectal swabs had come in, findings of the water samples and some more stool samples were still awaited. “Those should come within two to three days,” he said.
4. The government had earlier sent two medicos to Rayagada after the diarrhoea cholera outbreak, but they did not do their job properly, an official release said. The government, going by the release, claimed to be taking adequate measures to deal with the epidemic situation and has rushed additional doctors and para-medical staff of Rayagada.
- (i) Cholera is a _____
(ii) Cholera is caused when _____
(iii) According to state disease surveillance cell as many as _____ have succumbed to diarrhoea.
