SECTION A (READING)   (7)
I. Read the passage carefully and answer the questions
JURASSIC PARK

Do you enjoy being so terrified during a film that you can hardly breathe? If so, then I would recommend that you watch 'Jurassic Park.' But be warned- it's not the best DVD to select when you are alone at home.

The film is set on a remote island and centres around the work of a mad scientist who has, through experimentation, managed to breed dinosaurs in his lab. He hopes to create a dinosaur theme park and attract visitors in big numbers. To test out the impression his project might make in the future, he invites some guests for a preview.

The suspense is maintained throughout the film and the timing of the dinosaur attacks is perfect too. Just when you think it's safe to open your popcorn, another rampaging monster appears. However, the director does his best to make sure the tension is mixed with humour. For example, in one special effect we see a baby dinosaur hatching. He breaks out of his shell with such a cunning expression that I burst out laughing.

The scientist in 'Jurassic Park' has interfered with genetics and caused a catastrophe. It made me think that although scientists have the potential to bring many benefits, they can also bring terrible consequences.

Try not to miss this film. It's well-made, entertaining and makes you think. However, if you're watching it at home, I don't think your younger brothers or sisters should see it. In my opinion, it's too frightening for children under ten.

A. In this passage, the scientist has brought out awful consequences. Why has this negative opinion been created about the scientist?   **1**

B. 'Tension is mixed with humour.' How has the director brought out this situation?   **1**

C. 'The film centres around the works of a mad scientist.' Why is the scientist referred to as 'mad'?   **1**

D. Find the word with similar meaning from the passage   **(½ x 2 = 1)**

(i)disaster   **(ii)**isolated

II. Read the poem carefully and tick the right word from the given options. (½ x 6 = 3)

LEARNING FROM NATURE

Look at the birds, O children dear!
And learn to be carefree.
Look at the flowers, O little ones!
And laugh and live in joy.
From the deer you can learn to skip,
And learn to sing, from the birds.
Watch the sky and learn to draw,
A hundred scenes from the clouds.
Look at the trees O children dear!
And learn to serve always.
Look at the mountains and streams,
And learn to face the storms.
God has made this lovely world,
For you to see and learn,
Like the Sun you have to shine,
And brighten other's lives.
